Art Unit 2823

Allowable Subject Matter

1. Claims 1 and 7 are allowed.

2. The following is an examiner's statement of reasons for allowance:

" stamping of the storage medium using the stamping die so as to make predetermined zones of the active layer electrically conductive by means of localized plastic deformation"

Re. claim 1, Mori et al.(US 2002/0036927) discloses a method of producing an irreversible storage medium comprising an array of memory cells each memory cell comprising one zone of an active layer arranged between first and second conductors, binary information stored in the memory cell being determined by the electrical conducting state of the corresponding zone, method characterized in that it comprises assembly of a blank storage medium having an active layer which is in an initial insulating state(Abstract). However Mori et al. does not disclose stamping of the storage medium using the stamping die so as to make predetermined zones of the active layer electrically conductive by means of localized plastic deformation.

Claims 2-6 are also allowed as being directly or indirectly dependent of the allowed independent base claim.

3. Claim 7 is also allowed as being a linking claim to the allowed claim.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
